

EDUCATION

Cornell University, College of Engineering, Ithaca, NY
Candidate Bachelor of Science in Mechanical Engineering, **GPA: 3.5**
Minor: Dyson Business Minor for Engineers, Engineering Management

Expected May 2027

Selected Coursework: Introduction to Aeronautics • Intro Spaceflight Mechanics • Mechanical Design • Advanced Product Design • Mechatronics • Heat Transfer • Fluid Mechanics • Fluid and Heat Transfer Laboratory • Thermodynamics • System Dynamics • Statics and Mechanics of Solids • Engineering Economics and Management • Negotiations and Contracts for Engineering Management

SPECIALIZED SKILLS

Technical Software: MATLAB, Fusion360, SolidWorks, AutoCAD, Finite Element Analysis (FEA), LabView, IFS10
Manufacturing & Prototyping: 3D Printing (FDM, SLA), Machining (Mill, Lathe), Welding, Soldering
Programming: Python, Java, ROS2
Language: English (Native); Mandarin Chinese (Fluent)

RELEVANT EXPERIENCE

System Dynamics Course Assistant, *MAE 3260*, Cornell University **Aug 2026 - Present**
• Support 2 lab sections (21 students each) by troubleshooting equipment (function generators, oscilloscopes, and etc.)
• Ensure student comprehension of system dynamics by guiding 42 students through lab instructions

Research Assistant, *Napp Lab*, Cornell University **Feb 2026 - Present**
• Improve flight efficiency, aim to reduce drag by 10%, by designing custom drone propellers in Fusion 360
• Increase part reliability by 5%, as measured by durability testing, by 3D-printing high-tolerance propellers in resin.

Engineering Asset Management Intern, *APM Terminals/A.P. Moller-Maersk*, Elizabeth, NJ **June 2026 – Aug 2026**
• Supported 2027-2028 ROFO planning by organizing and analyzing asset data, including pulling reports from IFS
• Created a preventive maintenance routine and analyzed May-July PM compliance across 5 assets (STS, RTG, etc.)
• Analyzed an operational issue and proposed a framework for a final project using lean principles (including Gembas)

Mechanical Lead, *CUXR Project Team*, Cornell University **Feb 2025 – Aug 2026**
• Advanced treadmill bearing system design phase by ~40%, by leading end-to-end mechanical design
• Improved prototype assembly efficiency by 25% by designing and 3D-printing custom connectors for integration

Robotics Intern, *AgAID*, Oregon State University **June 2025 – Aug 2025**
• Improved grip force and positioning accuracy by analyzing 150 robotic gripper sensor data sets
• 20% boosted testing efficiency by developing a custom data proxy architecture and resolving ROS2 integration issues

WORK EXPERIENCE

Student Administrative Assistant I, *CALS Cooperative Extension*, Ithaca, NY **Aug 2025 - Present**
• Compiling and analyzing program participation metrics from 62 NY counties, supporting ~2500 volunteers
• Streamlined volunteer onboarding, reporting, and outreach by developing and standardizing training protocols

LEADERSHIP EXPERIENCE

Student Operations Manager, *Cornell Dining*, Ithaca, NY **Oct 2024 - Present**
• Achieve 95% unit-wide shift attendance and 4.5/5 satisfaction by managing daily operations for a 40-member team
• Optimized shift staffing by reducing headcount 50% by spearheading a major overhaul of shift operations

ACTIVITIES and INTERESTS

Snowboarding; Hiking; Fishing; Custom Mechanical Keyboards; Rolife Miniature Building; Legos; Cooking/Baking; Hands-on Projects; Crocheting; Knitting; Recreational Badminton; Photography; Travel; 3-D Printing; Metalworking; Glasswork; Pottery; Welding
